Art Unit: 2873

Allowed Claims: 1-20.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a display with on-substrate muxing as claimed, specifically comprising a column mux having MEMS contact-switch elements having a pair of contact electrodes and wherein the column signals are not driven by an off-substrate column driver but are driven by the column mux.

Specifically, with respect to independent claim 10, none of the prior art alone or in combination disclose or teach of a reduced-interconnect display comprising a mux array of MEMS switch elements each having first and second control electrodes and first and second contact electrodes as claimed, specifically wherein the column signals are directly driven by the mux array to the display array, reducing a number of signals for an off-substrate column interface.

Specifically, with respect to independent claim 18, none of the prior art alone or in combination disclose or teach of a MEMS display comprising multiplexer means coupled to display means by column traces and wherein said multiplexer means comprises a plurality of bit-mux means comprising a plurality of one-bit MEMS storage mux means as claimed, specifically wherein each one-bit MEMS storage mux means

Art Unit: 2873

comprises a plurality of MEMS switch means for electrically connecting a first to a second contact electrode and whereby muxing of the display data word is performed on the substrate means by the MEMS switch means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Martin et al (U.S. 6,741,384 B1), Morrison et al (U.S. 6,900,851 B2) and Hallbjorner (U.S. 2002/0186108 A1) are being cited herein to show MEMS devices and means of addressing them, but do not specifically disclose a display comprising contact electrodes and a column mux as claimed.
